

Release date

10 March 2022

Number	Name	Description	Benefit/Value
1	New PDF spinner wheel and pagination	We've added a new download spinner wheel to the application download pages in the interview journeys. The spinner wheel will show when the PDF applications are preparing to download. We've added pagination to these pages, so employers do not have to scroll down one long page.	Improves usability of updated pages.
2	Reserve list (shortlisting changes)	We have added a new feature which lets employers create a reserve list from the shortlisted applicants. Employers can save applicants to the reserve list and invite them to interview at a later date. We email shortlisted applicants to let them know they are on the reserve list, rather than send them a rejection email. This is in response to user feedback	Speeds up recruitment by allowing candidates to be easily saved and invited to interview in future.
3	Reserve list (interview changes)	We have added a feature to allow employers to access the reserve list during the interview stage. This will allow them to invite extra candidates to interview from the reserve list.	Speeds up recruitment by allowing candidates to be easily saved and invited to interview in future.
4	Tasklist address improvements	We have improved the way employers manage addresses while creating a job advert. The employer's name is now displayed as part of the address, so it is more visible in the listing.	Makes the process of managing addresses in listings more intuitive which saves time and effort.
5	Improvements to manage users	We have added the ability for a super user to add or change a user's role without it affecting their role in other organisations. This means that a user can have a different role in each organisation they are part of.	Removes barriers to users having the correct permissions for their roles across multiple organisations.
6	IAT consent	When an applicant accepts their offer, we ask them about IAT consent. We've improved the content on this page to make it clearer to the applicant what this means.	Improved understanding for applicants before they answer the IAT consent question.
7	Right to work document type values	The latest right to work document type values are now available to select for pre-employment checks.	Document types are aligned with the latest Home Office guidance.
8	Vacancy bulletin report	Job listing text is now included in the vacancy bulletin report for new job listings published from today.	Improved visibility of reporting data.
